

Autism West Midlands 5th Annual Autism Conference

About our partners

Options
with you...on your journey of care

Options are a national provider of specialist education and care for children, young people and adults with autistic spectrum conditions (ASC), learning disabilities and complex needs.

Supported by our embedded clinical team, we use best practice alongside our own innovative and robust evidence based models to deliver exceptional outcomes.

Our services and support are unique and bespoke to meet the needs of each person within our care. Due to the breadth of our services we are able to adapt to the needs of the individual at different points in time, enabling us to provide a range of care options within a journey of support for our young people and their families.

As a specialist provider we understand the importance of working with local charities and acknowledging the exceptional support that they offer to children, young people and their families.

We also understand that it is our duty to share our skills, knowledge and experience of working with children and young people with autism and want to ensure that we can offer support where we can. We look forward to partnering with Autism West Midlands for their 5th Annual conference this year.

Loddon Training & Consultancy provide training, consultancy and outreach services for people involved in the education and care of individuals who display behaviours of concern.

About us

PROACT-SCIPr-UK® is the registered trademark of Marion Cornick MBE, founding Principal of The Loddon School and Director of Liaise Loddon Ltd.

The training provides a whole approach for the individual, staff/parents and the organisation. It includes proactive, active & reactive strategies focusing on prevention rather than intervention. PROACT-SCIPr-UK® Courses have been accredited against the BILD Code of Practice since 2002.

Why we are partnering with Autism West Midlands

We would like to share our knowledge and experience to enable individuals who exhibit behaviours of concern to have the best quality of life possible.
